EISEDICHT®-Airtight Sealing Collars Fleece-Butyl

Permanently airtight sealing and plastering

The EISEDICHT® fleece butyl airtight sealing collars with their outstanding textured fleece adhesive surface are perfect for fast and permanent sealing of openings. The special feature of these sealing collars is that they can be plastered over.

These fleece butyl sealing collars allow for clean plaster joints when sealing openings in masonry, soft wood fibreboards and concrete. They are also suitable for use with floor screed, EIFS or floor slabs.

The adhesive flange consists of a butyl glue layer combined with a synthetic random fibre sheet. Please note: In order to achieve air tightness, it is necessary to plaster over the fleece butyl adhesive flange.

The grommets are made of permanently flexible EPDM rubber, which is very resistant to ageing and can be used in a wide temperature range.

Installation video

Fleece butyl adhesive flange:
Moistureproof and permanently airtight. Adheres to almost any material.

Long sealing grommet:
Large contact area with the cable or pipe

Fingerlift:
Handling aid for the protective film

Anti-kink grommet:
Safe sealing even of bending lines

Conical flexible grommet:
For different diameters. Offsets structural movement and relieves the sealing area.

Self-adhesive:
Completely tool-free assembly, wide adhesive surface

- ☑ Fleece sealing collar, suitable for plastering, for use on walls pre-plastering and behind exterior insulation finishing systems
- ☑ Guaranteed airtight in accordance with DIN 4108-7 and GEG 2020
- ☑ Airtight and thermal-bridge-free electrical installation in accordance with DIN 18015-5
- ☑ Meets the required level of tension relief
- ☑ Consistent, tool-free processing of all EISEDICHT® airtight sealing collars
- ☑ For interior and exterior use
- ☑ Permanently elastic grommet to offset structural movement
- ☑ Subsequent laying of cables possible
